Fork joints

SPECIFICATION

Version in Steel

Types

- Type **B**: Snap on spring pin
- Type **KL**: Pin with KL-shaft safety
- Type **SL**: Pin with SL-shaft safety (only for $d_1 = 4 \dots 16$)

Steel

- Tensile strength class 5
- zinc plated, blue passivated

Shaft safety

- spring sheet metal
- hardened and tempered
- zinc plated, blue passivated

Version in Aluminium

Types

- Type **KL**: Pin with side mount ring
- Type **SL**: Pin with safety clip

Aluminium **AL** anodized, black

KL- / SL-shaft safety

- Spring steel
- hardened and tempered
- zinc plated, blue passivated

Version in Stainless Steel

Type

- Type **A**: Pin with retaining ring

Stainless Steel AISI 303 **NI** uncoated

- Safety circlip DIN 471
- Stainless Steel
- German Material No. 1.4122

INFORMATION

Fork joints GN 751 consist of a fork head according DIN 71752 and a pin with KL-shaft (Type KL and SL) a pin with snap-on spring (Type B). Both versions can be dismantled without tools and monitor. Size $d_1 = 12$ is supplied with a fine thread M12x1.5 according to DIN. In practice, however, M12x1.25 is preferred. Standard DIN 71752 does not foresee size $d_1 = 20$.

ON REQUEST

Fork heads in accordance with DIN 71752 (see page 1152) with $d_1 = 25, 30, 35, 42$ and 50 (only Steel Version).

TECHNICAL INFORMATION

- ISO-Fundamental Tolerances (see page A21)
- Stainless Steel characteristics (see page A26)

Types of fork joint shafts

Snap-on spring

The snap-on spring pin is easily mounted and dismantled. It is therefore particularly suitable for applications where the articulated connection needs to be loosened often.

KL-shaft safety

The pin with side mount ring can be fitted and dismantled without tools, i. e. by hand.

SL-shaft safety

The pin with safety clip requires a tool for dismantling (e.g. a screw driver). It is therefore better secured.
